

The Perfect Smile

State of the Art Technology in dentistry makes a beautiful smile attainable for young and old.

What can captivate you more than a winning smile? The "Hollywood smile" symbolizes confidence, fame and fortune. Your smile is the "window to the world." My specialty is Creating Beautiful Smiles with Total Comfort Dentistry. Modern techniques can enhance your appearance and are more pleasant than ever before.

Years ago, people associated dentistry with pain. Not so any more! Today's dentistry is painless, very comfortable, and quite enjoyable. Properly applied, advanced techniques not only improve smiles but also strengthen and protect your natural teeth from further breakdown and wear from aging.

Cosmetic dentistry is easier than ever and corrects a multitude of dental-related problems. Eliminating unattractive fillings is one of many exciting improvements in dentistry. "Silver" fillings are no longer the only treatment choice. "Tooth-colored" fillings are becoming the standard used by many dentists to restore teeth with decay. In my office, "silver" fillings are not even an option. To this day, I've never had a patient ask for them.

People are more aware of health and cosmetic options than ever before. A growing number of people want to look better and feel good about themselves. As a result, the majority who enter my office demand a higher quality of dentistry. By taking time to thoroughly explain all treatment possibilities and discuss their concerns, our patients make educated decisions. They appreciate the importance of having the finest materials in their mouths and understand the increased benefits—immediate and long-term.

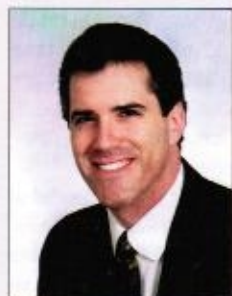

While more advanced techniques are slightly more expensive initially, they save money in the long term. I use only the highest quality materials available. They are stronger, more durable, and rarely require replacement. The old adage, "you get what you pay for," certainly applies to modern dentistry.

A beautiful smile boosts self-esteem. Have you noticed how people show their teeth? Self-confidence, or lack thereof, is clearly evident. People with attractive teeth smile frequently and easily. My goal is to make you feel like smiling, too.

Each person has a different smile and image. My office staff is a highly trained team of dental professionals. They can customize and personalize a new, enhanced smile to match your desires. To give a few examples, the photos show our patients' smiles—before and after treatment.

You deserve the look you want and we can help you achieve it. A brighter, cleaner, whiter, more confident look is possible. Our philosophy, "Dedicated to Excellence and the Finest Quality of Care" outlines my belief that only the best is good enough for our patients.

If you'd like more information, stop by our office at 1903 W. San Marcos Blvd., Suite 110 in San Marcos or call (760) 599-6559.

Nelson Y. Howard, D.D.S.
